

Admission to the master program of Computational Physics

Upon admission in the academic year 2020/2021 the interview will be replaced by a 1-2 page report in English, which will have the following structure:

1. Candidate's name, graduated bachelor specialization, graduation year.
2. Topic of the license thesis, original results obtained; other research if there is the case; publications, presentations at conferences if they were.
3. Computer programming skills acquired, level of programming knowledge.
4. Plans for the future, the areas of research in which the candidate is interested.

How to load this document on the platform will be announced later. The weight of the marks in the final average remains unchanged (50% the mark given by the committee on this report, 50% the average of the license exam).
