

Announcement

The Department of Biomolecular Physics announces the series of lectures held by

Prof. dr. sc. Branko Glamuzina

from the University of Dubrovnik, Croatia,

within the ERASMUS mobility program to the Faculty of Physics, Babes-Bolyai University.

The lectures topic is addressed to the students enrolled in the Biophysics and Medical Physics Master program.

**Program: *Friday, May 4, 2018, Time 12.00-16.00*
*room AE ("Augustin Maior" Amphiteatre)***

Topics : 1. Current challenges in the aquaculture sector and overtaking methods. Problems waiting for multidisciplinary solutions.

2. Recent results in seafood control and marine molecular environment; Romania-Croatia cooperation;

Tuesday, May 8, 2018, Time: 16-20, Room "Hermann Oberth"

Topics: 3. Biomaterials of marine origin: wasted or not yet discovered properties?

4. Ecosystems facing (nano)technology and human impact: quick solutions
